Zhou, W., F. Chen, K. Klyachkin, Yuk Y. Sham, and R. J. Geraghty. 2013. The amino terminus of herpes simplex virus type 1 gL is important for cell–cell fusion but not for gH trafficking; PREPRINT; IN PRESS. Journal of Virology.

Zhuang, C., S. Narayananpillai, W. Zhang, Yuk Y. Sham, and C. Xin. 2013. Rapid identification of small molecule inhibitors of Keap1–Nrf2 interaction through Structure–Based virtual screening and Hit–Based similarity search; PREPRINT.

“Computational Study of the Full Length HIV-1 Integrase DNA Model Provide Insights Into Protein-DNA Assembly and Potent Inhibitory Binding,” F Chen et al., poster presented at Chemistry Biology Interface Training Grant Symposium, U of MN, Minneapolis, MN (2012)

“Computational Study of Multi-Drug Resistant Acinetobacter baumannii Serine β-lactamase,” WS Shin et al., poster presented at ESPCA Advanced Topics in Computational Biology – Agrochemical and Drug Design, São Paulo, Brazil (2012)

“Computational Studies of a Ph Responsive Histidine Modified Cardiac Troponin I,” EM Houang et al., poster presented at 56th Biophysical Society Annual Meeting, San Diego, CA (2012)

“pH-Responsive Titratable Inotropic Performance of Histidine-Modified Cardiac Troponin I,” NJ Palpant, EM Houang, YY Sham, JM Metzger, Biophysical Journal,
Yuk Sham
Center for Drug Design

DOI: dx.doi.org/10.1016/j.bpj.2012.01.024 (2012)

“6-Benzoyl-3-Hydroxypyrimidine-2,4-Diones as Dual Inhibitors of HIV Reverse Transcriptase and Integrase,” J Tang, K Maddali, CD Dreis, YY Sham, R Vince, Y Pommier, Z Wang, Bioorganic and Medicinal Chemistry Letters, 21, 8, p. 2400 (2011)

“pH-Dependent Transport of Pemetrexed by Breast Cancer Resistance Protein,” L Li, YY Sham, Z Bikadi, WF Elmquist, Drug Metabolism & Disposition, 39(9):1478 (2011)

“N-3 Hydroxylation of Pyrimidine-2,4-diones Yields Dual Inhibitors of HIV Reverse Transcriptase and Integrase,” J Tang, K Maddali, CD Dreis, YY Sham, R Vince, Y Pommier, Z Wang, ACS Medicinal Chemistry Letters, 2:63 (2011)

“Triazole-Linked Inhibitors of Inosine Monophosphate Dehydrogenase from Human and Mycobacterium tuberculosis,” Liqiang Chen, Daniel J. Wilson, Yanli Xu, Courtney C.
